

OMAX Tilt-A-Jet

The industry's premier precision abrasive cutting head, the Tilt-A-Jet® lets the OMAX JetMachining® Center achieve virtually zero taper with most materials. The Tilt-A-Jet positions the nozzle at a precise angle calculated by the industry-leading Intelli-MAX® software to exactly offset the natural taper from the abrasivejet. Taper doesn't disappear. It is moved to the scrap part of the material, leaving your part with square, taper-free edges. The Tilt-A-Jet can be retrofitted to any OMAX machine, enabling precise taper-free machining for all JetMachining System owners. Once installed, there is no additional effort on your part, just press start and the Tilt-A-Jet does all the work automatically to produce taper-free high precision parts. Even squaring the Z-axis so it is exactly perpendicular to the slats is done in seconds with a single click in the Intelli-MAX software. The Tilt-A-Jet is the ideal solution for your taper-free machining needs.

FEATURES & BENEFITS

- Easily make interlocking pieces, dovetail fittings, and lead ins without taper to reduce secondary machining
- Tilting point positioned at material surface to reduce X-Y motion
- Easy to use, with no special programming required
- Continuously adjusts at thousands of points per inch along path
- Can be used on OMAX machines from the 2626 to the 160X
- Automatic re-squaring feature ensures nozzle is square to the table
- Ability to change angles quickly, further enhancing cutting speed
- Compatible with Precision Optical Locator and Rotary Axis
- Faster cutting of high precision taper free parts with no need to slow down to eliminate taper
- Servo-controlled programmable precision Z-axis with 6" of travel
- Faster cutting due to "tilt forward" capability
- Advanced servo design results in virtually zero backlash
- Programmable manual tilt up to $\pm 9^\circ$ for the maximum tilt angle
- Automatic taper elimination without any programming

The OMAX Technology Guarantee entitles you, as the original owner, to free OMAX software upgrades for the life of the machine.

TILT-A-JET

Standard Cutting Head

Tilt-A-Jet Cutting Head

WHAT IS TAPER?

Taper is the inherent difference in the width of the cut from top to bottom found in all abrasive waterjets. There are several types of taper found in cutting. The V-shaped taper is the most common, where the top of the cut is wider than the bottom. Reverse taper is often found in soft materials, where the bottom is eroded more than the top. In very thick materials, barrel taper can occur where the middle is wider than both the top or the bottom. Many factors affect taper, including material type and thickness, abrasive size, distance of nozzle from the material, and the speed of cutting. Some materials can even exhibit multiple forms of taper in the same edge, such as simultaneous reverse and barrel taper.

THE INTELLI-MAX ADVANTAGE

The Tilt-A-Jet takes full advantage of Intelli-MAX enhancements to minimize cutting times while maximizing part quality. The innovative Tilt Forward feature adjusts the jet geometry to minimize jet lag and can result in faster cutting even in straight-line cutting. The Intelli-CORNER optimization results in faster and more precise outside corners, as well as improved precision on inside corners. Rather than estimate an average taper along a path, the highly sophisticated Intelli-TAPER® system examines the entire tool path and calculates at thousands of points per inch the exact amount of taper compensation needed at every position along the path. The Intelli-MAX software can then fully utilize the motion range and flexibility of the Tilt-A-Jet to automatically cut taper-free parts quickly and precisely.

ABOUT OMAX

OMAX is the global total solutions provider in advanced abrasive waterjet systems. Our intuitive Intelli-MAX Software Suite simplifies programming and reduces setup times, increasing your productivity. OMAX engineers continue to innovate technology for abrasive waterjet machining, from proven 4th generation pump designs to cutting edge drive systems with micron-level accuracy. With the largest abrasive waterjet support network in the world, OMAX continues to shape the future of waterjets.

To see how an OMAX JetMachining Center can save you time and money, call or visit our website and request a free part analysis today.
